INVENTORY MANAGEMENT

BUILT FOR GROWTH

What is PRIVM?

PRIVM (Precise Inventory Management App) is a mobile-first platform built by PRIVM Labs — a technology firm specialising in transforming complex business operations into elegant, reliable software. PRIVM centralises all your stock operations, transaction history, asset tracking, and analytics into one intuitive app, available on both iOS and Android.

Whether you're running a single boutique or overseeing a network of warehouses, PRIVM gives you the real-time visibility and decision-making intelligence your business demands.

 iOS (iPhone & iPad)

 Android

“

A centralised, intelligent inventory platform that transforms the complexity of multi-location stock management into a decisive, data-driven advantage for your business.

– PRIVM Labs · Product Vision

Everything You Need to Run Your Inventory

PRIVM brings together the tools that matter most — from real-time stock visibility to detailed transaction histories — in a platform designed to grow with your business.

Multi-Store Management

Create and manage multiple store locations from one account. Search, filter by city, and sort stores by goods count or sales volume.

MULTI-LOCATION

FILTERABLE

Goods & Product Catalogue

Build a rich catalogue with SKU, category, colour, size, cost and selling price, and images. Set reorder points so the app alerts you before you run out.

SKU TRACKING

REORDER POINTS

Transaction Management

Four core movement types — **Sell**, **Restock**, **Return**, and **Dispose/Expiry** — fully timestamped and auditable.

SALES

RESTOCKS

RETURNS

Batch Cart System

Process multiple products in a single transaction. Add items with quantities and prices, then confirm as a batch sale or disposal in one tap.

BATCH SELL

EFFICIENT

Batch & Expiry Tracking

Track products at batch level with batch numbers, expiry dates, and unit costs. PRIVM surfaces the nearest expiry date so stock never spoils unnoticed.

BATCH NUMBERS

FIFO-AWARE

Expense Tracking

Capture and categorise every business expenditure. Expense data feeds directly into net profit calculations for a complete financial picture.

EXPENSE LOGGING

PROFIT IMPACT

Asset Tracking

Track fixed assets — equipment, machinery, vehicles — with serial number, purchase date, condition and lifecycle status.

SERIAL NUMBERS

LIFECYCLE

Stay Informed. Stay In Control.

Beyond the core stock ledger, PRIVM watches your business continuously — surfacing alerts, managing access, and adapting to how and where your team works.

Low Stock & High-Demand Alerts

When a product falls below its minimum threshold, an alert fires instantly. The high-demand algorithm analyses sales velocity to flag fast-moving goods.

AUTOMATED ALERTS

HIGH-DEMAND

Team & Role Management

Four access roles — **Owner**, **Partner**, **Manager**, **Storekeeper** — ensure each member sees exactly what their role requires.

4 ACCESS ROLES

SECURE

Multi-Currency Support

Each store is configured with its own currency code, so transactions, analytics and reports always display in the correct local currency.

PER-STORE

GLOBAL-READY

Transaction History & Audit Trail

Every sell, restock, return and disposal is logged with a full audit trail — essential for reconciliations and spotting discrepancies quickly.

FULL HISTORY

AUDIT-READY

In-App Notifications

A built-in notification centre keeps you updated on critical stock alerts, team activity, and store events — even on busy days.

STOCK ALERTS

ACTIVITY FEED

Dark Mode & Accessibility

Full light and dark mode support with system-adaptive theming for comfortable use in any environment.

DARK MODE

Analytics & Reports That Drive Decisions

PRIVM transforms raw transaction data into actionable intelligence — with interactive charts, financial summaries, and exportable reports built directly into the app.

Revenue & Profit Margin Chart

Bar-chart revenue overlaid with a line-chart profit margin. Visualise trends across 5 preset ranges, from 30 days to 5 years.

Financial Overview

Total Revenue, Gross Profit, Profit Margin (%), Net Profit, and Average Transaction Value — calculated in real-time.

Inventory Metrics

Track Units Sold, Total Restocks, Sell-Through Rate, and Total Losses to instantly spot efficiency gaps.

Transaction Activity Breakdown

Drilldown by type: Sales, Returns, Restocks, and Disposals (Expiry and Damage) for any period.

Top Selling Products

Ranked automatically by revenue and units sold — vital for restocking and promotional decisions.

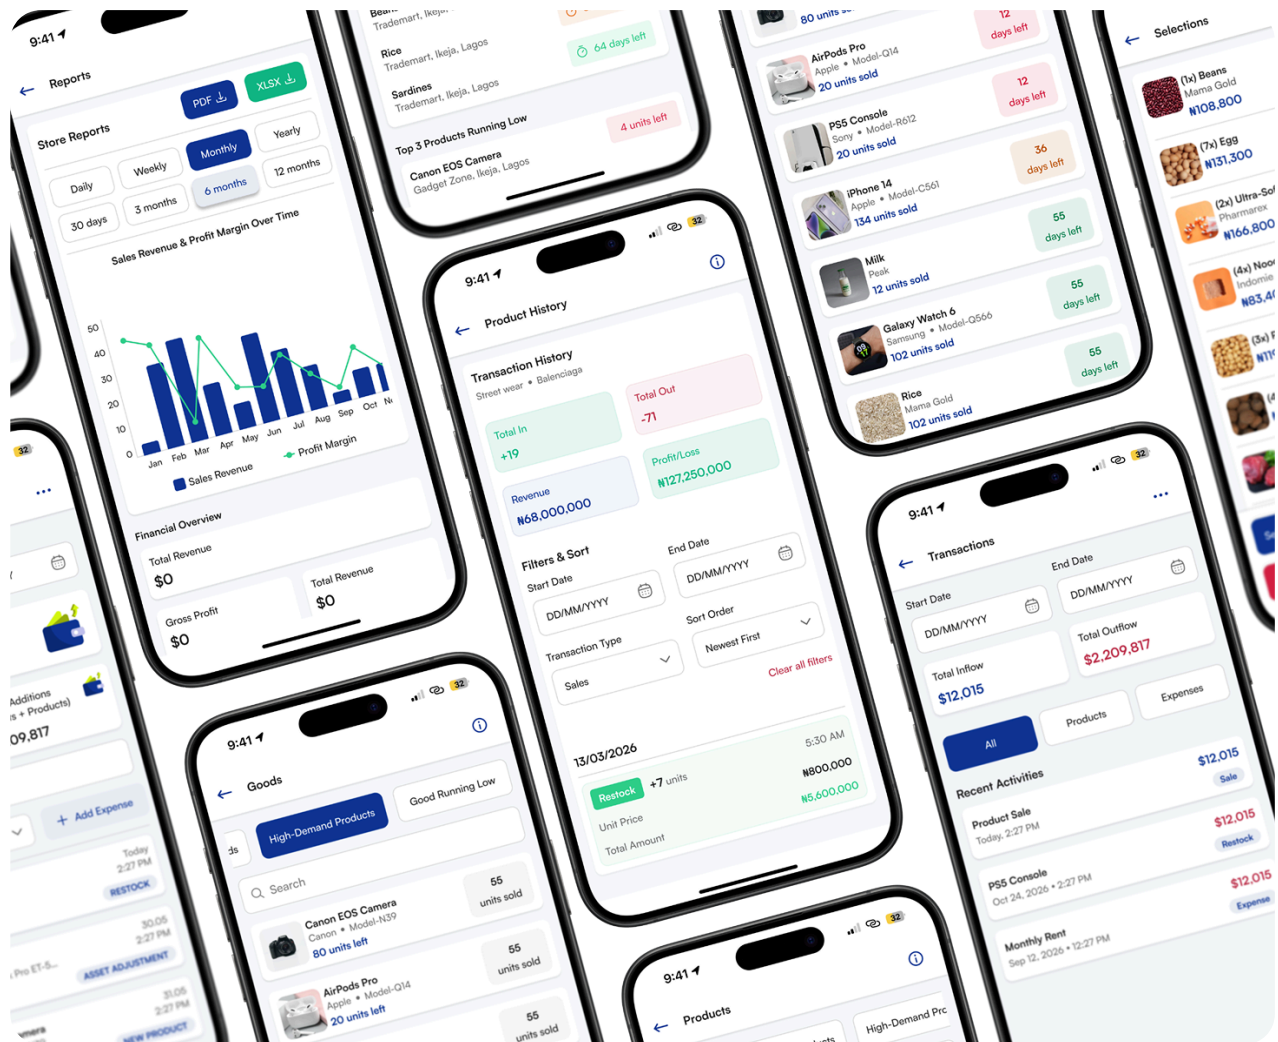

Low Stock Alerts Panel

Products below minimum thresholds are surfaced directly in Reports, current quantity vs minimum.

PDF & Excel Export

Export any report as a polished PDF or Excel file — ready to share, with no formatting required.

Up and Running in Minutes

PRIVM is built for fast onboarding. No training sessions, no complex configurations — just straightforward setup and immediate value from day one.

1

Create Your Account

Register with your email, verify via OTP, and set up your secure account with two-factor authentication enabled.

2

Set Up Your Store(s)

Add your store name, address, currency, and banner image. Create as many stores as your business needs.

3

Add Your Products

Populate your catalogue with goods and assets. Set SKUs, costs, prices, and reorder points for each item.

4

Invite Your Team

Add storekeepers, managers, and partners with role-based access. Each member sees only what they need.

5

Transact & Track

Record sales, restocks, returns, and disposals as they happen. Inventory updates in real-time across your team.

6

Review Your Analytics

Open Reports for your financial overview, trends, and stock health. Export as PDF or Excel for stakeholders.

Built for Teams of Every Size

PRIVM's role-based access system means the right people see the right information. Delegate confidently without compromising security.

Owner

- Full store control
- Manage all users & roles
- Transfer ownership
- Access all analytics
- Configure store settings

Partner

- Co-manage the store
- Add & edit products
- Record transactions
- View full analytics
- Manage team members

Manager

- Manage inventory
- Record transactions
- View reports
- Manage storekeepers
- Approve adjustments

Storekeeper

- Record daily transactions
- View assigned products
- Process sales & restocks
- Log disposals & returns
- Basic dashboard access

Enterprise-Grade Security. Startup-Friendly Speed.

PRIVM is built on a production-grade stack with security and reliability at its foundation — so your inventory data is always protected, accurate, and accessible.

Two-Factor Authentication

Optional 2FA protects every account with an additional verification layer.

Role-Based Access Control

Strict per-store guards ensure users only access the stores and actions their role permits.

OTP-Verified Registration

Every new account is verified via one-time password, preventing unauthorised creation.

“

I'm glad to be a beneficiary of the excellent services that PRIVM Labs offer. Truly, I got more quality than I expected. My business is better because of the awesome solution you created for us. Kudos to your team and keep up the good work.
